

Riga 2010 with CIM:LV beta

CIM:LV beta version 0.1

1. **Content**
2. **Installation**
3. **Compatibility with standart objects and other mods**
4. **Future plans**
5. **How realistic is this mod**

Content

- Two maps – one with pre-build tram tracks and without
- New colors for buses, trams, subways
- Own loading screen
- Own seal
- New colors for railway trains
- Latvian names for the citizens
- Banks from Latvia (Swedbank, Aizkraukles Banka, Citadele Banka, SEB Banka)

Installation

Extract the folder *maps* into *C:\Users\[Your Name]\My Documents\Cities in Motion*.

Extract the folder *metro* in the game instalation folder (f.e. *C:\Program Files\Cities in Motion*) overwrite everything if asked.

Compatibilty with standart objects and other mods

All modified buses, trams, trains are added to the game and used only for this map. So no standart objects will be overwritten and lost.

The only files overwritten are *de.strings* and *en_US.strings* which are responsible for the language (text).

This mod is compatible with the following mods:

CIM-CAM and More Mod from *XiDragons*

Future plans

- Rearranging the map for 1980, 1970, 1960, 1940, 1930 and 1920
- New colors for all buyable vehicles
- New colors for other vehicles (if needed)
- Renaming and remodeling the vehicle to be more realistic
- Rearranging the years in which a vehicle can be bought to be more realistic for Riga.

How realistic is this mod

All colors of the vehicle were changed to look more like used in Riga.

IMPORTANT!!! FOR THIS TO WORK CORREKTLY USE WHITE AS THE COMPANY COLLOR!!!

No other modification for the vehicles were made (Except Comet XL – which was transformed from double articulated bus to a single articulated bus).

Here some exapmples for the colors:

Bus

Tram

Subway

Because Riga has no Subway system the colors were taken from Railway trains or free formed from current bus/trams.

WITHOUT REAL LIFE EXAPMLE!

2011.03.05.

Railway trains and locomotives
